Profile

I am a detail-oriented professional with nearly 5 years of experience in software development, including almost three years in a commercial setting. I have a strong background in modern languages, frameworks, and technologies. With a keen eye for accuracy and a focus on continuous improvement, I excel in both independent and team-based environments, using my technical expertise to identify and resolve issues, drive testing efforts, and contribute to the success of quality assurance initiatives.

Experience

Junior Software Developer

Scaffoldbid

June 2023 - Present

- Contributed to the development of a robust testing suite using Playwright.
- Wrote a in house development tool to clean up test data in our platform staging environment and across multiple supporting services.
- Developed a feature so users can download assets from AWS S3 buckets while interacting with the UI.
- Implemented an admin panel tool to enable administrators to efficiently browse and manage user data.
- Applied our CircleCI version hashes to the backend via the Dockerfile and saved them locally using a bash script.
- Integrated a throttling feature into the platform to stop users from abusing asset downloads.
- Contributed to the development of Scaffoldbid using Nest.js, Angular, PostgreSQL and Docker.
